

## Evaluating Variable Expressions

1. Evaluate the expression when  $m = 4$ .

$$12 \bullet m = 60$$

2. Evaluate the expression when  $n = 2.5$

$$\frac{5}{n}$$

3. Evaluate the expression when  $c = \frac{1}{4}$

$$c + 2\frac{1}{4}$$

4. Evaluate  $6^3$

5. Evaluate  $1^8$

6. Evaluate  $(\frac{2}{3})^3$

7. Evaluate  $x^3$  when  $x = 2$

8. Evaluate  $y + v$  when  $y = 3$  and  $v = 2.3$
